

# THE AMERICAN BOARD OF ORTHODONTICS WRITTEN EXAMINATION READING LIST 2019

The objective of this reading list is to offer the practicing orthodontist a list of references, which may serve as a source of knowledge in preparing for certification. This reading list includes papers of historical as well as scientific interest. It is intended to give the orthodontist a broad perspective of the changing world of orthodontic theory and practice. It should be clearly understood that a bibliography, such as this, is not all encompassing and does not remain static. It will be continuously subject to additions and deletions. Whenever possible, links to the resource, full text or article abstracts are provided. *If you or your school are not subscribers to the journals included on this reading list, it may be possible to purchase single article access through the publisher. The ABO cannot provide the full text if the article or journal is not open access.*

The American Board of Orthodontics does not consider any of the articles and/or texts to contain the indisputable answer to any questions within the field of orthodontics. Examinees are responsible for the content of the entire reading list, even though some references may not be represented by an exam question. Current literature and textbooks on orthodontics may be studied in addition to the suggested references.

## RESOURCES

1. American Heart Association: CPR & First Aid Emergency Cardiovascular Care, <https://eccguidelines.heart.org/index.php/circulation/cpr-ecc-guidelines-2/>; Accessed July 30, 2018.
2. Agency for Toxic Substances & Disease Registry: Toxicological Profile for Ionizing Radiation, <https://www.atsdr.cdc.gov/ToxProfiles/TP.asp?id=484&tid=86>; Accessed July 30, 2018.
3. Berridge NL, Burke GAE, Reynolds PA, et al: 3D Head & Neck Anatomy for Dentistry, Primal Pictures Ltd, 2009. (*Or any contemporary anatomy resource*) Use this link to obtain discounted access for one month:
